

# Technical Data Sheet

## Suntant SCI85

Sodium Cocoyl Isethionate  
 CAS# 61789-32-0

### Characteristics

- It is a mild, high foaming anionic surfactant with high purity.
- It can exhibit excellent foam density, foam stability, lime soap dispersion and surface activity. Being hard water tolerant, it leaves no soap scum.
- It is compatible with soaps and anionic, non-ionic, amphoteric surfactants.
- Because of its anionic character, it should not be used with cationic components like cationic surfactants, cationic dyes, etc.

### Specifications

Item	Specification
Appearance	Off-white needles
Odour	Characteristic
pH (5% solution)	5.0 ~ 7.0
Active matter content (%)	≥ 85.0

### Applications

It is recommended for clear/pearlescent personal care products like liquid soaps, shampoos, shower gels and facial cleansers. It can also be used in soap bars formulation.

**Storage**                      Store in a clean, dry place at 15~35°C away from direct heat and sunlight.

**Shelf Life**                    2 years
