

Technical Data Sheet

Sunquat PQ7

Polyquaternium-7
 CAS# 26590-05-6

Mol. wt. 232.75
 Formula C₁₁H₂₁ClN₂O

Description

Sunquat PQ7 prevents or inhibits the buildup of static electricity and dries to form a thin coating that is absorbed onto the hair shaft. Polyquaternium-7 also helps hair hold its style by inhibiting the hair's ability to absorb moisture.

Specification

Item	Specification
Appearance	Clear colorless viscous liquid
Solid (%)	9.5 ~ 10.0
pH value (1% water solution)	5.0 ~ 8.0
Viscosity (cps/25°C)	8,000 ~ 15,000

Applications

- Efficiently used in shampoo. Strengthen and stabilize the foam of shampoo. Contributes luster and soft, silky feeling.
