

Technical Data Sheet

p-PDA

p-Phenylene Diamine

Description

Chemical Name p-Phenylene Diamine
CAS # 106-50-3

Formula $C_6H_8N_2$
Mol. wt. 108.14

Specifications

Item	Specification
Appearance	White Flake
Purity(%)	Min. 99.0
MDP(mg/Kg)	Max. 200.00
ODP(mg/Kg)	Max. 400.00
Melting point (°C)	Min. 138.00

Applications

It is important dye intermediates and is mainly used in the manufacture of dyes and sulfur dyes; it can also be used for the production of fur black D and rubber antioxidant DNP, 288, DOP, DBP etc. P-phenylenediamine can also be used as the raw material of cosmetic hair dye "WuErsi D", gasoline polymerization inhibitor and developer.

Delivery & Storage

Package 25kg/bag
Storage Store in a cool, dry area. Keep material in supplier's packaging.
