

Product Data Sheet

Product Name: SUNTOMER PF-08

Chemical Name: 1H,1H,2H,2H-Heptadecafluorodecan-1-ol;
2-Perfluorooctyl ethyl alcohol

Molecular Structure:

CAS No.: 678-39-7

EINECS: 211-648-0

Physical Properties

Form: White Solid

Molecular weight: 464.12

Boiling Point: 113°C @ 10mm Hg

Melting Point: 47 °C

Density(g/ml): 1.692

Ref. Index: 1.3086

Flash Point:>110 °C

PH: 3 to 7@20C

Solubility: All dissolve in ethanol, acetone, tetrahydrofuran, ethyl acetate and CH₃CN.

Specification

Purity: >99%

Application:

Textile repellents, coating and synthesizing fluorinated surfactants.

Raw material for synthesis of acrylate or methyl acrylate

Packing:

50L Sealed HDPE-lined steel drum

200L Sealed HDPE-lined steel drum
