

# Technical Data Sheet

## SUNXOL 808PP

### Description

Chemical Name Mixture: Active content(HALS, AO): 47~ 53%, PP: 40~70%  
 CAS # 9003-07-0, 167078-08-0, 67845-93-6

### Specifications

| Item                                      | Specification |
|---|---------------|
| Appearance                                | White pellets |
| Polypropylene Content (% , Cas:9003-07-0) | 40 ~ 70       |
| Hindered Benzene Content (%)              | 10 ~ 30       |
| Substituted amine Content (%)             | 10 ~ 30       |

### Applications

It acts as a light stabilizer and exhibits very good compatibility with polyolefins with no observed blooming. It provides exceptional surface stabilization when used alone or in combination with UV absorbers. It is used in polymers like polyolefins, polypropylene.

### Delivery & Storage

Package As required  
 Storage Keep sealed and avoid moisture. Store in dark and cool.
